Introducing Microsoft Teams Calling

It's the solution you're already using, transformed into a singular commtech experience. Microsoft Teams Calling combines the feature-rich digital collaboration you love with cloud voice calling via your business phone line.

Retire the office PBX

The first of it's kind, this solution integrates previously siloed communication systems and offers the ultimate in functionality and flexibility.

Flexible licensing options

You're fast paced and high growth. We're ready. Choose from our flexible licenses and scale up with ease as your business needs change. Includes local, national and mobile calls in Australia and New Zealand.

An amazing customer experience every time

Add advanced telephony features such as IVR, call routing and hold music to provide a professional customer experience without leaving the Teams app.

Round the clock expertise

We're constantly enhancing your comms experience with industry-preferred handset support and value driven integrations.
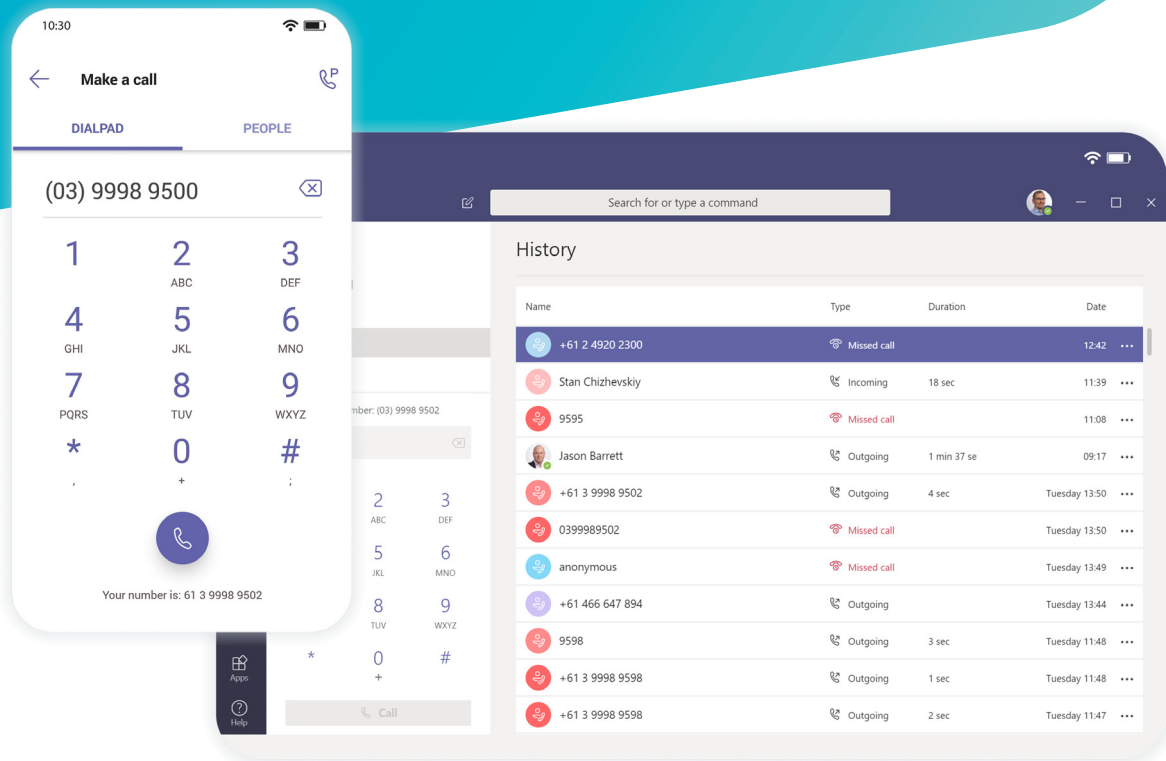

Big ideas are better together

Business collaboration should be mobile. Sync your communications across mobile, tablet and desktop devices to keep the conversation running and the ideas fresh.

cloud voice. video. chat. share

Is MS Teams Calling the right product for you?

Do you need?

- A phone system that accommodates staff travelling between the office and off-site locations?
- Call queuing and call recording to ensure compliance and optimize the customer experience?
- CRM integration to increase productivity and keep everyone in the loop?
- A product you can scale to your business needs with no lock in contracts?

A single communications platform to run your business.

One company phone number. Seamless transitions between office devices and digital apps. Our unique MS Teams Calling solution offers complete flexibility to your team, whether they're in the office or out and about.

Thinking about the customer experience? Select a user license plan with advanced call features such as call queuing, group-based routing and IVR. It's an intuitive integration built for growing businesses and it's backed by our core unified comms solution with carrier grade infrastructure.

Get started now.
