MOBILECORP

ENTERPRISE WIRELESS

Telstra Partner Awards 2023 Winner
Mobility Partner of the Year
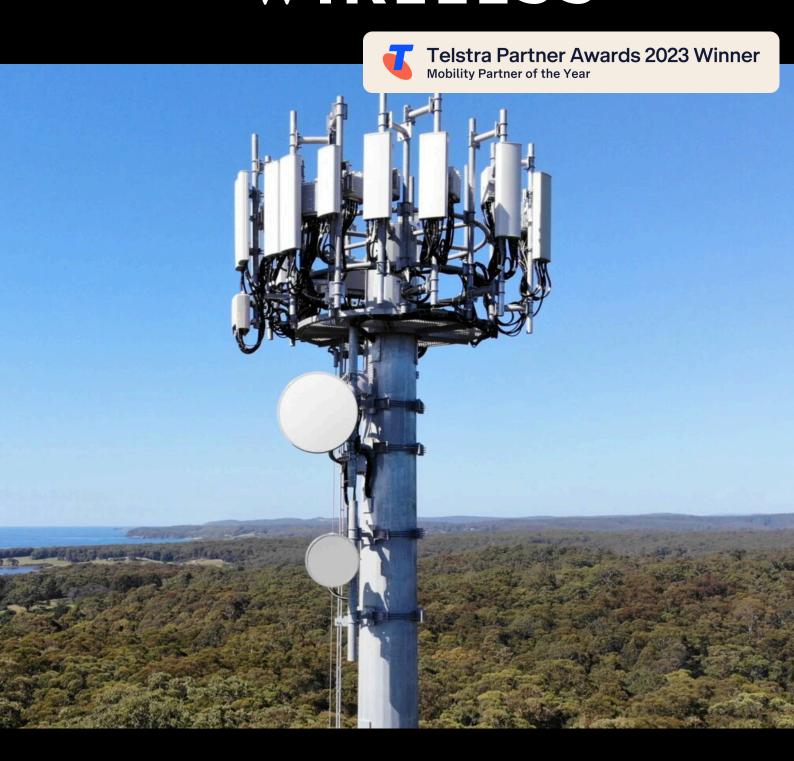

THE FREEDOM TO CONNECT THE ENTERPRISE - ANYWHERE

MobileCorp offers two Enterprise Wireless solutions that leverage the superior speed and low latency of Gigabit-class LTE and 5G.

Wireless is a viable alternative to fixed infrastructure	◈
Wireless protects business continuity through link diversity	🕺
Wireless enables data-hungry use cases at the edge	☁

ENTERPRISE WIRELESS

- Suitable for fixed, semi-permanent, temporary, or pop-up sites
- Suitable for primary or failover link
- Day 1 Connectivity
- LTE and 5G as dual connectivity
- Dual SIMs for two carriers / failover

Access the fast speeds, high bandwidth, and low latency of LTE and 5G for your wireless WAN solution. Combine a world-leading Cradlepoint router with your 5G network of choice and MobileCorp's professional and managed services, to deploy an Enterprise Wireless connectivity in hours.

5G ENHANCED ENTERPRISE WIRELESS

- A premium 5G wireless solution with 5G network uptime guarantee of 99.5%
- Includes professional installation of Cradlepoint W2005 and high gain antenna
- Includes managed service by MobileCorp with service desk, out-of-band management, network monitoring and outage alerts, Cradlepoint NetCloud instance build.

This solution is only available with Telstra. The 5G network guarantee is achieved by ensuring 5G signal is accessed from two separate Telstra towers. This also means that Enhanced Enterprise Wireless is best suited for permanent and semi-permanent sites. High bandwidth and fast speeds make it ideal for a primary link, edge compute or redundancy.

ENTERPRISE WIRELESS
PROFESSIONAL SERVICES

LTE | 5G Site Assessment

We assess the viability of your site address for 5G or LTE.

Determine the optimal location for router positioning, the bill of materials required, and the cost of installation.

Solution Architecture

Fit-for-purpose wireless WAN solution design, build, and deployment by MobileCorp.

Standalone Wireless or hybrid WAN networks.

On-Site Installation

We optimise your signal strength by deploying a professional installation by certified technicians.

We add high gain antennas and high performance cabling. Weatherproof and secured.

Cradlepoint Hardware Selection

We ensure you have the best Cradlepoint router for the job.

MobileCorp holds the '5G for Enterprise Branch' specialisation which means we are certified to deploy the Cradlepoint W2005 Outdoor Wideband Adapter.

Proof of Concept

Just trial it.

Before going 'all in', we offer the opportunity to trial an Enterprise Wireless solution in-situ.

Device Configuration

We configure.

You plug and play!

Our certified Cradlepoint engineers will configure your device for secure, optimised network integration.

Carrier Provisioning

SIM and Plan aligned to your use case.

MobileCorp is carrier agnostic and Cradlepoint routers also offer dual SIM for your choice of network providers.

NetCloud Build

NetCloud is a game-changer for router management.

We build your instance giving visibility of all your Cradlepoint devices, and their connectivity status. We also deliver remote out-of-band device management.

ENTERPRISE WIRELESS
MANAGED SERVICE

Technical Helpdesk

Australian-based technical support. MobileCorp's certified Cradlepoint engineers provide ticketed support via email or phone to responsive SLAs.

24/7 Network Monitoring

We proactively monitor your Cradlepoint network connectivity, deliver automated incident alerts, and remediate connectivity issues as they arise.

Remote Troubleshooting

Over-the-air and out-of-band management of your Cradlepoint devices including testing, resets, configuration changes, firmware and security updates

Tower maintenance notifications

Be forewarned about planned tower maintenance and scheduled outages with our proactive notification emails.

Device Hot Swap

If anything goes wrong, MobileCorp will set it right.

We will manage the swap out of any Cradlepoint device that needs replacement.

NetCloud Management

MobileCorp engineers hold Cradlepoint's highest accreditations and are NetCloud experts ensuring your network is leveraging the latest advances in 5G and Cradlepoint wireless WAN technology.

Why MobileCorp?

MobileCorp is APAC's leading Cradlepoint Partner

MobileCorp holds the highest level of Cradlepoint accreditation as a Cradlepoint Elite Partner. We were the first in Australia to hold the 5G for Enterprise Branch specialisation and are the current Cradlepoint APAC MSP of the Year.

This means you can leverage our knowledge and trust our expertise with Cradlepoint Wireless WAN network architecture, deployment, and management.

32 REASONS WHY..

MobileCorp is carrier agnostic but we do recommend Telstra for superior 5G reach. MobileCorp has 32 year's experience as an MSP serving Australian organisations large and small. We are also a Telstra Platinum Partner.

450 REASONS WHY..

MobileCorp has a proven track record with enterprise, business and government customers. We currently serve over 450 Telstra customers and have deployed 5G wireless connectivity to hudreds of Australian business addresses nationwide.
