THE FREEDOM TO CONNECT THE ENTERPRISE - ANYWHERE

MobileCorp offers two Enterprise Wireless WAN solutions that leverage the speed and low latency of LTE and 5G and world leading Cradlepoint hardware.

Wireless is a viable alternative to fixed infrastructure

Wireless protects business continuity through link diversity

Wireless enables data-hungry use cases at the edge

ENTERPRISE WIRELESS

- Suitable for fixed, semi-permanent, temporary, or pop-up sites
- Suitable for primary or failover link
- Day 1 Connectivity
- LTE or 5G

Access the fast speeds, high bandwidth, and low latency of LTE or 5G for your wireless WAN solution. Combine a world-leading Cradlepoint router with your 5G network of choice and MobileCorp's professional and managed services, to deploy an Enterprise Wireless connectivity in hours.

5G ENHANCED ENTERPRISE WIRELESS

- A premium 5G wireless solution with 5G network uptime guarantee of 99.5%
- Includes professional installation of Cradlepoint W1855 and high gain antenna
- Includes managed service by MobileCorp with service desk, out-of-band management, network monitoring and outage alerts, Netcloud instance build.

This solution is only available with Telstra. The 5G network guarantee is achieved by ensuring 5G signal is accessed from two separate Telstra towers. This also means that Enhanced Enterprise Wireless is best suited for permanent and semi-permanent sites. High bandwidth and fast speeds make it ideal for a primary link, edge compute or redundancy.

CRADLEPOINT PROFESSIONAL SERVICES

Experts you can count on

LTE | 5G Site Assessment

We assess the viability of your site address for 5G or LTE.

Determine the optimal location for router positioning, the bill of materials required, and the cost of installation.

Solution Architecture

Fit-for-purpose wireless WAN solution design, build, and deployment by MobileCorp.

Standalone Wireless or hybrid WAN networks.

On-Site Installation

We optimise your signal strength by deploying a professional installation by certified technicians.

We add high gain antennas and high performance cabling. Weatherproof and secured.

Cradlepoint Hardware Selection

We ensure you have the best Cradlepoint router for the job.

MobileCorp holds the '5G for Enterprise Branch' specialisation which means we are certified to deploy the Cradlepoint W2005 Outdoor Wideband Adapter.

Proof of Concept

Just trial it.

Before going 'all in', we offer the opportunity to trial an Enterprise Wireless solution in-situ.

Device Configuration

We configure.

You plug and play!

Our certified Cradlepoint engineers will configure your device for secure, optimised network integration.

Carrier Provisioning

SIM and Plan aligned to your use case.

MobileCorp is carrier agnostic and Cradlepoint routers also offer dual SIM for your choice of network providers.

NetCloud Build

NetCloud is a game-changer for router management.

We build your instance giving visibility of all your Cradlepoint devices, and their connectivity status. We also deliver remote out-of-band device management.

CRADLEPOINT MANAGED SERVICE

Your 'always on' Elite Partner

Technical Helpdesk

Australian-based technical support. MobileCorp's certified Cradlepoint engineers provide ticketed support via email or phone to responsive SLAs.

24/7 Network Monitoring

We proactively monitor your Cradlepoint network connectivity, deliver automated incident alerts, and remediate connectivity issues as they arise.

Remote Troubleshooting

Over-the-air and out-of-band management of your Cradlepoint devices including testing, resets, configuration changes, firmware and security updates

Tower maintenance notifications

Be forewarned about planned tower maintenance and scheduled outages with our proactive notification emails.

Device Hot Swap

If anything goes wrong, MobileCorp will set it right.

We will manage the swap out of any Cradlepoint device that needs replacement.

NetCloud Management

MobileCorp engineers hold Cradlepoint's highest accreditations and are NetCloud experts ensuring your network is leveraging the latest advances in 5G and Cradlepoint wireless WAN technology.
